Education:

-Bachelor's degree in Computer Science
Catholic University in Erbil (CUE) - Iraq.
High School Diploma - graduated with 98.83

Languages:

Kurdish: - Native
English: - Excellent
Arabic: - Excellent

Brief Background:

Results-driven Senior Software Engineer with 5+ years of experience designing, developing, deploying, and scaling enterprise-grade software solutions across web, mobile, cloud, and AI platforms. Expertise spans software architecture, system design, full-stack development, cloud infrastructure, cybersecurity, DevOps, AI integration, and mobile application development.

Experienced in leading projects throughout the complete software development lifecycle, from requirements analysis and architecture design to deployment, optimization, and maintenance. Strong background in building scalable, secure, and high-performance applications using modern technologies and industry best practices.

Passionate about solving complex business challenges through technology and delivering software solutions that create measurable business impact.

Employment History

Mega Academy. 2022 – Present (Present as Penetration Tester for Web)

Location: Online

Job Title: **Senior Software Engineer**

My work included:

- Architect and develop enterprise-level web and mobile applications serving large user bases.
- Design scalable software architectures using modern design patterns and best practices.
- Lead development initiatives across frontend, backend, cloud, and mobile environments.
- Build secure and high-performance APIs using NestJS, Node.js, TypeScript, PostgreSQL, and Redis.
- Implement CI/CD pipelines that significantly improve deployment efficiency and software quality.
- Optimize application performance, scalability, and reliability across production environments.
- Mentor junior developers and establish engineering standards and coding guidelines.
- Collaborate with stakeholders to transform business requirements into technical solutions.

Freelance Senior Software Engineer . 2023 – Present

Location: Online

Job Title: **Software Engineer.**

My work included:

- Deliver custom software solutions for startups, businesses, and enterprise clients worldwide.
- Design and develop SaaS platforms, ERP systems, management systems, and AI-powered applications.
- Build full-stack applications using React, Next.js, NestJS, PostgreSQL, and cloud technologies.
- Develop cross-platform mobile applications using Flutter and Dart for Android and iOS.
- Provide software architecture consulting and technical leadership for complex projects.
- Perform security assessments, performance optimization, and infrastructure modernization.
- Integrate AI technologies and automation solutions to improve business productivity.

Sinjar Academy. 2020 – 2022

Location: Ninewa, Sinjar, Iraq

Job Title: **Software Engineer.**

My work included:

- Developed and maintained web applications and backend systems supporting educational platforms.
- Built scalable APIs and backend services using modern software engineering practices.
- Participated in software analysis, system design, implementation, testing, deployment, and maintenance.
- Improved application performance, reliability, and maintainability through continuous optimization.
- Contributed to architecture discussions and technical decision-making processes.

Technical Skills

Software Architecture

- System Design
- Software Architecture
- Clean Architecture
- Domain-Driven Design (DDD)
- Event-Driven Architecture
- Distributed Systems
- Design Patterns
- SOLID Principles
- CQRS

Programming Languages

- TypeScript
- JavaScript
- Dart
- Python
- PHP
- Java
- C#
- SQL
- C/C++

Database Engineering

- MySQL
- PostgreSQL
- SQL Server
- MongoDB
- Redis
- Database Design
- Query Optimization
- Data Modeling
- High Availability Strategies
- Replication & Performance Tuning

Frontend Engineering

- Frontend Development
- React.js
- Next.js
- Angular
- Vue.js
- HTML5
- CSS3
- Tailwind CSS
- Bootstrap
- Redux
- Zustand

Backend Development

- Node.js
- NestJS
- Express.js
- Laravel
- ASP.NET Core
- REST APIs
- GraphQL
- WebSockets
- Microservices Architecture

Cloud & DevOps

- AWS
- Docker
- Kubernetes
- CI/CD Pipelines
- Linux Administration
- Nginx
- Apache
- Infrastructure Automation
- Monitoring & Logging
- High Availability Deployment

Cybersecurity & Web Security

- Web Application Penetration Testing
- OWASP Top 10
- Secure Software Development
- Vulnerability Assessment
- Security Auditing
- Authentication Security
- Authorization Models
- API Security
- Incident Analysis

AI & Intelligent Systems

- OpenAI Integration
- AI-Powered Applications
- Workflow Automation
- Intelligent Agents
- Data Processing Pipelines
- API-Based AI Systems
- AI Product Development

Mobile Development

- Flutter
- Dart
- Android Development
- iOS Development
- Firebase
- Riverpod
- Provider
- Bloc Pattern

Certificates

- Computer science at Catholic University in Erbil (CUE) .
- Intensive Course at Mega academy .
- Dozens of Udemy Courses .
